Profile

Electronics engineer specialized in analog and mixed-signal circuit design, power electronics, and embedded systems integration. Experienced in schematic development, simulation, and verification of electronic boards, including tolerance and stress analysis. Skilled in hardware–software coupling, PCB design, analytical design justification, and cross-functional collaboration. Proficient with LTSpice, C/C++, and PCB CAD environments (KiCAD + Eagle). Focused, rigorous, and detail-oriented.

Portfolio: florianpasco.com

Professional Experience

- 07/2025 – **Electronics Engineer – EV Charging Systems, BMW Group**, Munich, Germany, Internship
Present
- Analysis and benchmarking of mixed-signal AC wallboxes to identify best practices and optimization potential
 - Reverse engineering and verification of analog and digital circuits to improve hardware and firmware functionality
 - Development of test plans for circuit verification and validation under real and simulated load conditions
 - Execution of tolerance and performance analyses for design justification and internal reporting
 - Development of the hardware for the next generation of AC wallboxes
- 07/2024 – **Assistant Electronics Engineer, Breizelec**, Châteaulin, France, Internship
02/2025
- Diagnosed and repaired complex ECU mixed-signal boards with up to 40% recovery rate improvement
 - Conducted schematic reconstruction and signal-path analysis using reverse-engineering methods
 - Built a test bench with CAN-bus simulation for faster fault identification and verification
 - Applied analytical methods such as stress and tolerance analysis to identify failure causes
- 07/2023 – **Electronics Technician – Embedded Systems, AgriProTech**, Quimperlé, France, Internship
09/2023
- Developed and tested mixed-signal modules for autonomous ground vehicles
 - Integrated analog sensors, signal-conditioning circuits, and power converters
 - Performed analog circuit simulation in LTSpice and validated system-level interfaces

Education

- 02/2024 – **Master of Science in Electronics, ENIB – École Nationale d'Ingénieurs de Brest**, France
11/2025 Advanced coursework in analog and digital electronics, embedded systems, control theory, and circuit simulation.
- 09/2020 – **Bachelor of Science in Electronics, ENIB – École Nationale d'Ingénieurs de Brest**, France
02/2024 Strong foundation in electronic design, system integration, and control engineering.

Technical Skills

Analog & Mixed-Signal Design	Signal conditioning, PID control, power conversion, stress and tolerance analysis
Simulation Tools	LTSpice, MATLAB and Scilab
CAD / PCB Design	EAGLE, KiCad

Embedded Software C/C++, Python, firmware integration, debugging
Measurement & Testing Oscilloscope, logic analyzer, spectrum analysis, circuit verification
Verification Mixed-signal validation, test design, benchmarking, documentation

Soft Skills

Analytical mindset, precision, problem-solving, teamwork, interdisciplinary collaboration

Volunteering

2023 **Junior Network Coordinator**, *Open Bidouille Camp Brest*, Brest, France
Coordinated a network of 20 maker associations; organized public events with 2000+ attendees.

2022–2023 **Secretary**, *ENIB Cafeteria Association*, Brest, France
Planned and managed 40+ student events and logistics for 300–400 participants per event.

Languages

English C1 – fluent (technical)
German A2 – basic, improving
French Native speaker

Additional Information

Interests: Circuit simulation, robotics, open-source hardware, renewable energy systems, running

Munich, 14 October 2025

A handwritten signature and initials. The initials 'F' and 'P' are written inside a circle, separated by a vertical line. Below the circle, the name 'JOSCO' is written in a stylized, cursive font.
